

National Corvette Museum report for March 2018

The Corvette museum is finally coming out of its winter doldrums. A lot of events are scheduled for the upcoming year.

To get started we have to take care of business and that means the parking lot banner application are now available. The banner has been in place from our club for the last 7 or 8 years. When the banner comes down for the winter months it is sent to the club and we give it as an award to the club person of the year.

There are a few spots left on the "Flint Brick Wall". This is in the St Louis Corvette Assembly Plant area of the museum. You can have your name, business or club name engraved on a signature plate and attached to one of the 629 bricks in the display. These brick are from the original corvette assembly plant in Flint Michigan which was torn down in 2003.

I think Norm commented on this but build sheets and window stickers are available from the museum for any vet built there since 1981

Remember the Michelin NCM Bash is from April 26 thru the 28th. I understand one of our more prominent corvette salesmen, Mike Furman, from Criswell Chevrolet in Maryland will be at the bash for the entire weekend, look him up.

Upcoming raffles:

March 15, a 2018 Long Beach Red Z06 coupe. 1000 tickets @\$250 each

March 29, a 2019 Blade Silver coupe 1000 tickets. @\$150 each.

That's all folks, enjoy your spring. Jim
