

This is the first report for this year and it seems that spring has sprung in Bowling Green.

First of all, the museum has purchased over 200 hundred acres adjoining the current motor sports track property. This is undeveloped land at this time used for farming but the museum has held an option to buy for several years and the option was coming up so the land was bought in January. At this time there is no future development scheduled.

Next, we are all aware of the new corvette delivery program that the museum sponsors well since the first delivery in September 1995 to December 20 2018=there have been 12,000 corvettes delivered through the program. Something to note is this 12000th delivery went to a California couple who flew to Criswell Chevrolet in Maryland and ordered their car through Mike Furman who some of know through Norm, then flew to the museum again from California for the delivery.

Again, this year the museum is having their Valentines membership drive. They are offering a Family membership at half price at \$50.00. Remember the \$50.00 is tax deductible. This gives you free admission to the museum along with immediate family, a 10 percent discount for this store merchandise, and a discount on car rentals and hotels. There are other discounts that you can see by going on line. This offer expires February 28th, 2019

There is a raffle coming up on Thursday February 7th it is a \$10 per ticket raffle and it is for a 2019 Artic White Stingray Coupe. Goes off at 2PM Ct.

These are only a few of the items and events taking place at the museum and sports track. Please take a minute to go online and see the many offerings available at the museum.

Thanks Jim
